

Parro's Range Rules

- All Parro's employees have unquestionable authority regarding the rules and operations of the range. Any deviations from the rules must first be approved by a Range Safety Officer. All range commands given by the RSO will be followed immediately.
- All shooters are expected to know, follow, and help enforce the range rules. If you witness a violation of the rules, please inform a RSO or employee.
- Everybody must follow the four basic rules of gun safety at all times;
 - Treat every gun as if it were loaded
 - Keep your finger off the trigger until you are on target and ready to fire
 - Never point the gun at anything you are not willing to shoot or destroy
 - Be sure of your target and what is behind it
- All federal, state, and local laws must be followed.
- We reserve the right to deny service to anyone, at any time and for any reason.
- No food, beverages, chewing tobacco, snuff, or smoking are allowed inside of the range.
- Alcohol and drug use is prohibited. Nobody under, or suspected to being under, the influence of drugs, alcohol, or any other intoxicating substance, even if its prescription, will be allowed in the range. Persons smelling of alcohol or marijuana, or appearing to be intoxicated or impaired will be required to leave the range.
- All shooters must watch the safety video, pass safety test, and have a signed waiver on file.
- For a person to draw and shoot from a holster they must pass an exam administered by an RSO/RSA.
- No services for compensation may be provided on the range between private individuals.
- Nobody can rent a gun if they are by themselves, have no experience, or do not bring a firearm with them. Military, LE, and range members are exempt from this ruling
- Parro's employees, range staff, and RSO have the right to inspect all firearms, ammunition, and equipment.
- All NFA/class 3 firearms are subject to presentation of paperwork.
- When a **CEASE FIRE** is given, stop shooting immediately. Place the firearm on the shooting bench and step back from the firing line. Await further instruction from the RSO or another Parro's employee.
- The Range Safety Officer on duty is in direct charge of the range and all the participants. The RSO may ban, eject, or revoke a membership to anybody being unsafe or acting in a careless manner.
- Minors under the age of 18 must be accompanied by a parent or guardian to sign a waiver for range use. Anybody under the age of 18 must be accompanied by a parent/guardian to use the range. Nobody under the age of 13 is permitted inside of the range.
- Nobody under the age of 21 can purchase handgun ammunition or rent a handgun. Somebody under 21 can use a handgun in the range provided that a parent/guardian has provided them the gun and ammo.

- Driver's license will be held as collateral on all rental firearms.
- All Parro's rental firearms can only be used with ammo purchased with the rented firearm.
- Only use the correct ammunition for your firearm. It is your responsibility to make sure the firearm is safe to operate and to know how to operate it safely.
- All ammunition is subject to a magnet check. Ammo that sticks to a magnet is not allowed on the range. This includes, but not limited to, steel core, steel jacketed, armor piercing, incendiary, or tracer ammunition. Aluminum cased ammo is also not allowed on the range.
- The following ammunition is not permitted for use in the range;
 - Handloads/Reloads
 - Blackpowder/Muzzleloader
 - BB/Airsoft
 - Shotguns firing birdshot (only Buckshot and slugs may be used)
- Remanufactured ammo is acceptable if produced by a licensed manufacturer with insurance, such as Freedom Munitions, Bullseye, Black Hills, etc.
- All firearms entering or leaving the range must be unloaded and cased. A holstered pistol is considered cased. You may not handle a firearm until you are in your lane or under the direct supervision of a Parro's employee.
- Dry fire is only permitted on the lane while pointing downrange. Do not handle firearms or magazines off the firing line.
- Eye and ear protection are always required in the range. Place eye and ear protection on before entering the first door to the range.
- Do not pick up brass off the ground. Push it forward of the firing line. Do not throw brass in the garbage can.
- Any equipment or personal items left in the range are at the owner's risk. Parro's is not responsible for lost or stolen items.
- Two people maximum allowed per lane. Only one person may fire at a time from the shooting lane.
- Do not exchange or transfer firearms from lane to lane unless they are unloaded and cased.
- Un-aimed or un-controlled fire is strictly prohibited. This can include rapid fire. You are responsible for any damages to the range equipment and damages may result in repair fines. RSO may ask you to leave or revoke memberships if damages occur.
- Targets must be hung at an appropriate height to ensure the fired rounds impact the backstop and not the floor or ceiling. This can be easily achieved by ensuring the target is level with the muzzle of the firearm
 - Shoot from the center of the bay
 - No prone shooting
 - Rifle/Pistol rests can be used off the bench

- Only paper or cardboard targets are allowed on the range. No photos of real people as targets. Parro's staff reserves the right to prohibit targets we deem offensive.
- You may never shoot objects on the floor, walls, or ceiling. You may only shoot your lanes target. No shooting neighbors' targets or crossing lanes. Parro's reserves the right to shut down the lane at any time.
- If you encounter or believe you encountered a malfunction due to ammunition keep your muzzle pointed downrange. Maintain your grip and stance while pointing downrange for at least 30 seconds. Clear the firearm and run a safety flag down the barrel to check for obstructions. **DO NOT** look down the barrel. Call over the RSO if you need assistance. The most common ammunition malfunctions are;
 - Misfire: The ammunition does not go off. This could be caused by the firearm or the ammunition
 - Hangfire: Delayed ignition of the powder charge. The gun hesitates to fire
 - Squib Load: This is a weak or underpowered round. The bullet can partially go down the barrel but never exit. This is a safety concern as the bullet is now an obstruction in the barrel. A squib is usually identified by a quiet pop that does not sound like a normal round going off
- Never cross the firing line or proceed in front of the shooting bench.
- In case of an emergency, power outage, or fire alarm, treat these as if a **CEASE FIRE** command has been given and await further instruction from the range staff.
- Proper attire is required to protect you from hot brass. No open toed shoes or low-cut tops are permitted in the range. In the event hot brass should fall into your clothing, calmly set the firearm on the bench before removing the hot brass.
- Pictures are permitted of your group, targets, and firearms only. A second person can record you firing, but you cannot use a cell phone while holding or firing a gun. **No selfies on the firing line!**
- Always wash your hands and face immediately after exiting the range. There are provided lead wipes staged around the range, and a sink located in the restrooms.
- Cover any cuts or open wounds before entering the range. If you sustain an injury in the range notify the RSO.
- Any person with a medical condition which may pose a safety concern or potential hazard should inform the RSO prior to using the range. This includes but not limited to epilepsy, Parkinson's, or a hearing impairment.
- Pregnant women are advised to limit their lead exposure and are asked to consult their physician before using the range.
- Please be courteous and aware of the other shooters on the range.
- All rules and procedures are subjected to change. It is the shooters/member's responsibility to review and abide by any changes to the rules.
